

(50) 6" x 6" Bilge/Marine Pillows

Product Images

Short Description

50 each of 6" x 6" Hydrocarbon Solidifying Bilge/Marine Pillows

The Bilge/Marine Pillows are ideal for removing sheen and oil from bilges of recreational or commercial vessels. The Hydrocarbon Solidifying Polymer formula used in the pillows is slower acting but the Polymers used increase in size to allow visual inspection of bilge for removal of spent pillow. Also can be used in oil water separators, retention or containment structures and utility vaults or manholes. Environmentally friendly, will polish sheen, unlimited shelf life, and can be disposed of in most landfills.
