

Track Runners

Product Images

Short Description

- **High-Visibility Design:** Made from bright yellow 20 mil vinyl-coated fabric to enhance visibility and improve safety.
- **Abrasion Protection:** Designed to offer effective protection against tire abrasion from lighter-duty vehicles, ensuring longevity and integrity.
- **Wide Temperature Range:** Functional in extreme conditions, from -40°F to 180°F, ensuring reliability in various environments.
- **Easy Deployment:** Simple to position and deploy within the berm for immediate use.
- **Cost-Effective:** Minimizes the need for frequent repairs or replacements, saving on maintenance costs over time.

Description

High-visibility berm protection against tire abrasion for lighter-duty vehicles.

Enhance the performance of your spill containment berms with track runners, designed for effective protection against tire abrasion. Crafted from high-visibility, yellow vinyl-coated fabric, these runners are ideal for lighter-duty vehicles, providing a reliable surface to minimize wear on the berm's interior. Track runners fit seamlessly inside the berm, ensuring safe operation while improving visibility. Built to withstand diverse conditions, they are an essential addition for maintaining the integrity of your spill containment system.
