

Ground Tarps

Product Images

Short Description

- **Enhanced Berm Longevity:** Protects spill containment berms from abrasion and wear, increasing their lifespan.
- **High-Visibility Design:** Made from bright yellow 20 mil vinyl-coated fabric to enhance visibility and improve safety.
- **Wide Temperature Range:** Functional in extreme conditions, from -40°F to 180°F, ensuring reliability in various environments.
- **Quick Setup:** Lightweight design allows for easy and efficient positioning.
- **Cost-Effective:** Minimizes the need for frequent repairs or replacements, saving on maintenance costs over time.

Description

Protect spill berms from punctures and wear on rough terrain.

Ground Tarps provide a dependable protective solution for spill containment areas by acting as a barrier against various ground hazards. Constructed from durable vinyl-coated fabric, these tarps shield against potential leaks and damage caused by rocks, gravel, abrasive debris, and uneven terrain. They are also effective in situations where berms are deployed on loose soil, mud, or saturated ground, offering an extra layer of protection in challenging conditions. By preventing wear and punctures from environmental hazards, ground tarps help maintain the integrity and effectiveness of your containment solution.
